PUSHING CONTROL BOUNDARIES

The DiGidot C4 Live is a multi functional LED pixel controller that converts Art-Net and DMX to SPI protocols. The output capacity varies from 4 up to 16 universes, which is 8192 channels (depending on the license). The internal DHCP server, Wi-Fi and free DiGidot App grant easy access of the built in web interface. A built in network switch allows multiple DiGidot C4 controllers to be daisy chained to create an extensive control network. Countless extra features such as DMX in and out, Art-Net IP Address filter, Art-Net routing, HTP input signal merger, Art-Net & DMX Monitor, in-/output channel repeater, Gamma correction, adjustable fall back color, output limiters, make this product to the most powerful LED pixel controller on the market.
