Description

Introducing the newly revised Gantom 7, the ultimate solution for lighting designers who want to pack a powerful punch in a small package. With its seven-color output and compact design, this LED spotlight delivers a soft yet punchy beam that produces homogeneous color mixing, even at close distances.

Featuring a native 15 degree beam angle, the Gantom 7 includes 4 diffusion filters, hex louvre, and optional top hat, half hat, and angled cowlings for easy control over the beam. Plus, its native DMX control and balanced dimming curve make it perfect for even the most demanding of lighting designers.

At just 7 watts, the Gantom 7 is a highly efficient LED fixture that offers a virtually unlimited color palette. So, whether you're illuminating a small space or a large venue, the Gantom 7 has everything you need to create stunning lighting designs.
