## WHAT MAKES OUR LIGHTS THE NUMBER ONE CHOICE?

### Talkback+

Detect all available lights, set them up, check their status, configure DMX addresses and DMX profiles.

### Seamless Runtime

Set the length of your event and be sure that your lights won't run out while still getting the maximum brightness.

### TruColor Calibration

Individually calibrated lights lead to 100 % color consistency and exact color reproduction of color temperatures and standard filter gels.

### Effects

Quickly create programs out of colors and effects. Turn multiple programs and lights into scenes.

### Flicker Free

Scrambled PWM technology to avoid flickering when filming.

### Green/Magenta correction

Adjust green/magenta during content creation to reduce post-production work.

### Scheduled Stand-by

Switch lights into power-saving standby and schedule them to wake up when the event starts.

### Dynamic Power-boost

This exclusive feature makes the light able to display the maximum brightness at all time and intensify non-white colors.

### Emergency Light

Switches to white light when AC power is cut to keep your event save.

### Anti-theft

The lights give visual and audible alarm and send a notification to the AsteraApp if they are being moved during an event.

### DJ Feature

Auto BPM analyzes the beat and matches programs to it, flash buttons can trigger special effects while being held down.

### Other features

The AsteraApp is packed with many additional items and new features are frequently added via software updates.

## 100% WIRELESS

### Max. 20h

Advanced battery technology and control let you set the battery runtime to up to 20 hours. You can be sure that your Astera fixture won't run out of juice before your production is finished.

### Wireless DMX

Each of our lights has a CRMX module from LumenRadio built in, offering you the most reliable DMX technology on the market.

### App

AsteraApp offers intuitive and fast control of complex lighting setups and is also used to change DMX settings of the lights as well as monitor them out of a distance.

### IP65

All Astera fixtures come in IP65 waterproof housings to make sure you can use them outdoors without worries.

# ASTERA APP

## The most powerful lighting control App for film and event lighting

The AsteraApp is the result of 10 years of development and specifically designed for fast and efficient temporary light setups. It is much more than a lighting control app as it also does all the setup that would usually be done on the light itself and enables many new features that cannot be found in any other light. All in all, it is a huge time-saver when setting up, monitoring or controlling lights.

### CREATIVITY AT YOUR FINGERTIPS

Create complex animated effects with thousands of pixels that stretch over multiple lights. The AsteraApp offers an intuitive user interface with preinstalled and fully customizable programs and effects.

### SMART DIAGNOSING AND EDITING

Easily setup and monitor your lights from the palm of your hand, no matter how complex your production may be. Powerful tools let you quickly adjust settings of multiple lights, e.g. when preparing them for DMX usage.

### COMPLEX CUSTOMIZABLE EFFECTS

Choose from a wide range of preinstalled, highly customizable effects. Have all lights react simultaneously without delay or stretch effects over multiple lights. Your lights will remember and repeat these effects without requiring a constant wireless link.

..and more functions:

**SCENES**

**WAREHOUSING**

**MANUALS INCLUDED**

**SCHEDULED STAND-BY**

**BACKUP & HANDOVER**

**AUTO-UPDATES**

### WIDE APPLICATION RANGE

The AsteraApp is designed for beginners and professional operators alike. It is suitable for event and film lighting scenarios no matter if you control just one light or a complex setup with different groups of hundreds of lights.

### PRECISE COLOR INPUT METHODS

AsteraApp offers several useful tools to select colors so you are covered no matter if you want to mix your own color or input an exact RGB value or x, y coordinate. Thanks to Astera's industry-leading digital calibration, the fixtures are able to reproduce the exact color selected in the app.

### GROUP YOUR LIGHTS

AsteraApp can control individual lights but is also able to create a total of 256 groups each with multiple lights. To increase your possibilities even further, groups can have multiple positions/addresses.

# BLUETOOTH BRIDGE

Connect directly an AsteraBox or newer Astera lights via Bluetooth. The connected device will revert AsteraApp commands to other Astera lights via UHF band. The new ART7-WIFI can also connect via WIFI as an alternative to Bluetooth.

## Astera Light\* as BluetoothBridge

\*BluetoothBridge works with Titan Tube BTB, Helios Tube BTB, Hyperion Tube BTB, AX1-BTB, AX2-BTB, AX5-BTB, AX9, PixelBrick, NYX Bulb, HydraPanel, LeoFresnel and PlutoFresnel

## Astera Box as BluetoothBridge

# ASTERABOX

ART7-U  
ART7-WIFI

AsteraBox is the interface between lights and controller. It works as Bluetooth Bridge that can be carried on your belt thanks to its built-in battery. It can also be connected to a DMX desk to transmit wireless DMX data to all Astera lights and other lights with CRMX receiver.

# THE ASTERA SYSTEM

- Set up Lights**  
Set up your lights conveniently out of the distance. Adjust DMX settings on one or several lights. After your job, do a master reset.
- Monitor Lights**  
Check your lights while operating them. View battery status, settings, targeted lights and get informed if a light is being moved.
- Control Lights**  
Send effects and colors to your lights. Choose which lights you want to target. Save programs for quick launch later.

- Wireless DMX**  
The AsteraBox works as a wireless DMX transmitter with CRMX technology, just connect it with the included XLR adapter.
- Compatible**  
Astera Lights can be controlled together by CRMX and W-DMX (limited compatibility) so you can use them together with other wireless lights.

# TITAN LED ENGINE

The heart of the Titan LED engine is a revolutionary algorithm which generates an individual calibration for each light after measuring its photometrics during Astera’s manufacturing process.

This not only leads to accurate colors and total consistency between fixtures but also optimizes the output for high CRI and long battery runtime, no matter if displaying whites or highly saturated colors.

Temperature compensation during operation constantly measures the temperature of each LED chip and adjusts the intensity of the red, green, blue, mint and amber LEDs accordingly to maintain an even output.

With this technology the Titan LED engine can reproduce precise color temperatures, RGB values and colors defined by x, y coordinates from the AsteraApp and DMX consoles.

To ensure a high level of precision, selected Service Centers can re-calibrate the LEDs after a long runtime if needed.

# TUBES. FOR EVENTS. FOR FILM. FOR BOTH.

**HELIOS TUBE**

**TITAN TUBE**

**HYPERION TUBE**

Designed for Film/Broadcasting lighting and the highest performance. All 3 tubes are optimized for ultra-high CRI/TLCl and peak brightness. In addition to wireless power and control, they can be wired with power and data through a single cable.

**PIXEL TUBE**

An affordable yet very powerful battery LED tube for stage, event and entertainment lighting. It can be used on stages, around event sites and to create stunning lighting effects. A highly creative device that offers an infinite range of possibilities.

## THE NEW TUBES - WITH BLUETOOTH BRIDGE

Our new Titan Tubes and Helios Tubes contain Bluetooth Bridge, a technology that Astera has been integrating into lights such as NYX Bulb, PixelBrick and AX9. You can connect your phone or tablet directly to the tube and use it to control additional Astera lights. An AsteraBox is not needed anymore for App control. Additional information on page 5.

### IDENTIFY TUBES WITH BLUETOOTH BRIDGE

BTB-enabled Titan & Helios Tubes are marked with a BTB Logo.

# AX9 PowerPAR

## AX5's Big Brother – Twice as bright!

The AX9 utilizes the AX5's successful 3-in-1 concept which allows it to be used as wireless light and elegant uplight as well as a wired PAR light for longer or bigger installations. This makes it an extremely cost-efficient light and keeps your investment to a minimum. The AX9 packs extreme brightness in a compact and light housing while still giving you industry-leading colors and white tones thanks to its Titan LED Engine.
